

Allied Health

Geneva's Allied Health program prepares students to care for others. This program enables students to continue their education at professional schools with the solid foundation of the structures, functions, regulation, and interrelatedness of all God's creation. Allied health prepares students for advanced study with coursework in chemistry, physics, and research needed for medical school and other training. Situated within our rigorous core curriculum, this program gives students the technical training needed to succeed in their career and higher education goals, while being rooted in the mission of Geneva College.

Allied Health/ Biology (Pre-PT)

Geneva's Allied Health- Biology Pre-PT program prepares students to care for others. This program enables students to continue their education at professional schools with the solid foundation of the structures, functions, regulation, and interrelatedness of all God's creation. Allied Health prepares students for advanced study with coursework in chemistry, physics, and research needed to pursue physical therapist training and education. Students are assigned a faculty member to help them pursue individualized study to ensure they receive the skills and education needed to follow their calling. Situated within our rigorous core curriculum, this program gives students the technical training needed to succeed in their career and higher education goals, while being rooted in the mission of Geneva College.
