

Biblical Studies

The main feature of **Geneva's Biblical Studies program** is our redemptive-historical perspective, in which both the Old Testament and the New Testament are seen as the progressive unfolding of God's perfect plan, culminating in the person and work of Jesus Christ.

Students will be challenged to engage the course material at a high level. Our graduates often pair a major in our department with majors in business, human services, psychology and the sciences and use their education in graduate school, ministries, and international service.
