

Physics

Geneva's Physics program is dedicated to providing an education that is founded on Biblical principles. Studying physics allows students to gain a better understanding of the Creator. Throughout this program, students will learn valuable information that will prepare them for careers in the scientific community. This program encourages students to conduct their own research by planning and completing an independent project in theoretical, applied, or computational physics. Upon the completion of this program, students will have spent significant time learning about physics and have ample experience through hands-on physics problems and research. They will finish with the technical knowledge necessary for a successful career in their chosen occupation and the strategic foundation for future growth.
