

Public Health

Geneva's Public Health program empowers students to make meaningful impacts on the medical systems in place in our society today. The program will equip students with knowledge of epidemiology, sociology, economics, research methods, data analysis, and political science. Geneva College partners with Rize Education to deliver a program that features exceptional online training from expert public health educators. Throughout the course of this program, students will develop the critical skills necessary to make strategic and informed choices that will shape public health policies that have the potential to revitalize communities throughout the world.
