Prerequisites: BIOD 151 – Essential Lab Human Anatomy & Physiology I or equivalent

Instructor: Renee Correll, DPT

Facilitators: Brittany Martinez, Ph.D.
Jerrod A. Poe, Ph.D.
Christine Bowman, DMD
Heidi Burtt, DPT
Crista Bush, MOT, OTR/L
Alycia Dalgay, MPAS, PA-C
Tammie Kephart, MS, RDN, LDN
Rebekah Stepp, MS, CRNP
Kelly Straley, CRNP
Brandon Zangus, MOT, OTR/L

Contact Information: Faculty may be contacted through the Portage messaging system

Additional Information: www.portagelearning.com*

Course Meeting Times: BIOD 152 is offered continuously

Course Description: A continued systematic discussion of the anatomical and physiological systems within the human body. The systems discussed are the nervous system and the special senses, circulatory system, reproductive system including discussions of mitosis/meiosis and heredity, and the urinary system with a discussion of fluid and electrolyte balance. Modules cover the common pathology and treatments associated with each of the systems outline above. The laboratory component of this course is delivered using virtual labs and interactive simulations with detailed instruction and demonstrations from an experienced instructor.

Course Outcomes: As a result of this course experience a student should be able to:

- Define the anatomy and physiology of the central and peripheral nervous systems as well as the special senses
- Describe the anatomy and physiology of the cardiovascular system
- Explain the anatomy and physiology of the male and female reproductive systems
- Explain the anatomy and physiology of the lymphatic and immune systems
- Describe the anatomy and physiology of the urinary system
- Describe in detail the physiology of urine formation and acid-base balance

*Please see the Module & Lab Topics section below for expanded course outcomes.

* Portage Learning college courses are offered by Geneva College, which is regionally accredited by the Middle States Commission on Higher Education. Portage Learning is included in the College’s Department of Professional and Online Graduate Studies; courses are delivered through the PortageLearning.com platform.
**Lab Outcomes:** As a result of this laboratory experience, students should be able to:

- Identify major anatomical structures of the central and peripheral nervous systems and understand their function
- Identify the main anatomical structures of the eye and ear and understand the physiologic processes of hearing and sight
- Identify the main anatomical structures of the heart and vessels and understand blood flow through the heart, systemic, and pulmonary circuits
- Explain blood typing
- Identify the main anatomical structures of the male and female reproductive systems and understand the physiology of reproduction
- Identify the main anatomical structures of the urinary system and demonstrate understanding of urinalysis

Each of these BIOD 152 student learning outcomes is measured:

**Directly by:**
1. Module application problems (with instructor feedback)
2. Exams
3. Lab reports and lab exams
4. Comparison of pre-course / final exam results

**Indirectly by an end of course student-completed evaluation survey**

**Course Delivery:** This course is asynchronously delivered online and is composed of 50 - 60 hours of reviewed module assignments with instructor feedback, 7 contact hours of secure online module exams, 15 – 20 hours of observation of demonstration labs and 8 hours of lab exams.

**Course Progression:** It is the policy for all Portage Learning courses that only one lecture module and the accompanying exam be completed each day. Research on the best practices in learning indicates that time is needed to process material for optimal learning. This means that once an exam has been completed, the next exam will *not* unlock until the following day. This allows for instructor feedback/class expectations as the student moves through the material. Instructors, like the College, are not available during the weekend; grading, therefore, is M-F and may take up to 72 hours during these days. Also, it is the policy of Portage Learning to support a minimum of 21 days; this is not a negotiable time period. Please plan your time accordingly.

**Required readings, lectures and assignments:** Portage courses do not use paper textbooks. Students are required to read the online lesson modules written by the course author which contain the standard information covered in a typical course. Please note the exam questions are based upon the readings. Video lectures
which support each lesson module subject should be viewed as many times as is necessary to fully understand the material.

**Module Review Questions:** The practice problems within the modules are not quantitatively part of your final grade, but the module work is a pass/fail component of the course and will be reviewed for completeness by the instructor. **Be sure to answer all of the problems, being careful to answer the questions in your own words at all times since this is an important part of adequate preparation for the exams.** After you answer the practice problems, compare your answers to the solutions at the end of the module. If your answers do not match those at the end, attempt to figure out why there is a difference. If you have any questions please contact the instructor via the My Messages tab.

**Academic Integrity** is a serious matter. In the educational context, any dishonesty violates freedom and trust, which are essential for effective learning. Dishonesty limits a student’s ability to reach his or her potential. Portage places a high value on honest independent work. In a distance learning situation, we depend on the student's desire to succeed in the program he or she is entering. It is in a student's own best interests not to cheat on an exam, as this would compromise the student's preparation for future work. It is required of each student to take exams without consulting course materials or study aids including another person, the lesson pages, printed materials, or the Internet. **Students may not copy and paste responses in the answer boxes from any source, including their own notes or drafts in a word processing document, unless explicitly instructed to do so.** To this end, your instructor will be alert to any indications that a student may be violating this principle. It will be necessary to show all your work on exams. When the nature of the course does not require numerical or symbolic determination (perhaps instead just requires recitation of learned descriptions), our experienced staff is able to detect the unauthorized consultation of study aids when answering exam questions. A violation of the academic integrity policy may result in a score of zero on the exam and possible expulsion from the course, at the discretion of the instructor with consultation with an administrative-instructional committee.

Review the Student Handbook for more specifics. If you have any questions regarding the academic integrity policy, please consult your instructor prior to taking module exam one.

**Required Computer Accessories:** It is recommended that students use a desktop or laptop computer, PC or Mac, when taking the course. Some tablet computers are potentially compatible with the course, but not all features are available for all tablet computers. The latest full version of Google Chrome, Firefox, Edge, or Safari browser is required for the optimal operation of the Canvas Learning Management System. In addition, some courses will use the Respondus Lockdown Browser for exams. Instructions on downloading and installing this browser will be given at the start of the course. It is recommended to also have the latest version of Flash installed as a browser plugin as some sections of the course may require it. We highly recommend using a high-speed Internet connection to view the video lectures and labs. You may experience significant difficulties viewing the videos using a dial-up connection.
For more information on basic system and browser requirements, please reference the following:
System requirements: https://community.canvaslms.com/docs/DOC-10721-67952720328
Browser requirements: https://community.canvaslms.com/docs/DOC-10720

**Module & Lab Topics**

**Module 1:** In this module students are introduced to the central and peripheral nervous systems as well as the autonomic nervous system and its divisions. Physiology of action potentials, neuroglial cells, and reflexes are covered in-depth.

**Module 2:** In this module students are taught in depth content of the central and peripheral nervous systems, including anatomy of the brain, spinal cord, cranial nerves and spinal nerves. The physiology of the autonomic nervous system is covered in-depth. Practical application is included through the overview of common pathology and injury to the nervous system.

**Module 3:** In this module students are given a complete overview of the anatomy and physiology of the nervous system’s special senses, including vision, hearing, smell and taste.

**Module 4:** In this module students are introduced to the cardiovascular system. Content includes an anatomical overview of the heart and surrounding vessels and structures. This module also covers the blood and its composition. Students are taught in-depth about the blood flow through the heart, pulmonary, and systemic circuits. In addition, there is an in-depth overview of the physiology of the cardiac cycle including electrical impulses. Practical application is included through the overview of diseases of the cardiovascular system.

**Module 5:** In this module students are introduced to the anatomy and physiology of the lymphatic system and the study of immunology. Practical application is included through the overview of common diseases of the lymphatic and immune systems.

**Module 6:** In this module students are taught a basic overview of sexual reproduction. Content includes a complete anatomical overview of the male and female reproductive systems and an in-depth physiologic study of the differences between the two including oogenesis, spermatogenesis, and menstruation. The stages of pregnancy, labor, and delivery are also covered in-depth.

**Module 7:** In this module students cover the urinary system. Content includes a comprehensive overview of the anatomy of all structures within this system including an in-depth study of the kidney, its blood and nervous supply, as well as the physiologic processes of filtration, reabsorption, secretion, and regulation of urine concentration and volume. Content also includes an in-depth discussion of acid-base balance. Practical application includes the discussion of pathology associated with these topics.
Lab 1: In this lab students have in-depth instruction on the central and peripheral nervous systems. Content includes discussion of the anatomical structure and function of the four divisions of the brain as well as the spinal cord. Cranial nerves are also discussed with practical application of signs/symptoms should they be damaged.

Lab 2: In this lab students have an in-depth review of the anatomy of the eye and ear as well as the physiologic processes of sight and hearing.

Lab 3: In this lab students have an in-depth study of the anatomy of the heart structure and major vessels. Content includes discussion of the difference between vessels in the systemic and pulmonary circuits as well as blood flow through these circuits.

Lab 4: In this lab students review blood flow through the heart and the systemic and pulmonary circuits.

Lab 5: In this lab students are introduced to blood types. Content includes a discussion on antigens and antibodies and their function within blood as well as how to determine what blood type a person may have. Practical application includes various case studies.

Lab 6: In this lab students are exposed to microscopic views of various tissues throughout the digestive, endocrine, and reproductive systems.

Lab 7: In this lab students have an in-depth overview of the male and female reproductive anatomy. Content includes discussion of male/female sex organs, gametes, hormones, and secondary sex characteristics.

Lab 8: In this lab students review in-depth the anatomy and physiology and the kidney and other structures within the urinary tract. Practical application is provided with discussion of normal and abnormal urinary findings as well as a demonstration of urinalysis.

**Required Labs and Assignments:**
For the laboratory portion of the course, students will observe an experienced lab instructor. It is the responsibility of the student to view each lab video in its entirety and only mark the lab as “done” when it is completed. Please note that the use of outside material (i.e. the internet, textbooks, articles, etc.) is not permitted while taking the lab exams. A recommended lab schedule can be found on the home page of each lab; the student should follow this schedule to meet course objectives.
**Suggested Timed Course Schedule** (to complete the course within a typical college semester)

All Portage courses are offered asynchronously with no required schedule to better fit the normal routine of adult students, but the schedule below is suggested to allow a student to complete the course within a typical college semester. Despite this suggestion, the students may feel free to complete the course at their desired pace and on a schedule determined by them.

</table>
**Grading Rubric:**

6 Module exams = 100 pts. each x 6 = 600 pts.
8 Lab exams = 30 pts. Each x 8 = 240 pts.
Final exam = 120 pts.
Total 960 pts.

The current course grade and progress is continuously displayed on the student desktop.

**Grading Scale:**

89.5% - 100% (860 - 960 pts) = A
79.5% - 89.4% (764 - 859 pts) = B
69.5% - 79.4% (668 - 763 pts) = C
59.5% - 69.4% (572 - 667 pts) = D
<59.4% (<572 pts) = F

**Suggested External References:**

If the student desires to consult a reference for additional information, the following textbooks are recommended as providing complete treatment of the course subject matter.

- Richard Drake PhD FAAAA, *Gray’s Anatomy for Students*, Churchill Livingstone
- John E. Hall, *Guyton and Hall Textbook of Medical Physiology*, Saunders

**Learning Support Services:**

Each student should be sure to take advantage of and use the following learning support services provided to increase student academic performance:

- **Video lectures**: Supports diverse learning styles in conjunction with the text material of each module
- **Messaging system**: Provides individual instructor/student interaction
- **Tech support**: Available by submitting a help ticket through the student dashboard

**Accommodations for Students with Learning Disabilities:**

Students with documented learning disabilities may receive accommodations in the form of an extended time limit on exams, when applicable. To receive the accommodations, the student should furnish documentation of the learning disability at the time of registration, if possible. Scan and e-mail the documentation to studentservices@portagelearning.com. Upon receipt of the learning disability documentation, Portage staff will
provide the student with instructions for a variation of the course containing exams with extended time limits. This accommodation does not alter the content of any assignments/exams, change what the exam is intended to measure or otherwise impact the outcomes of objectives of the course.

**One-on-one Instruction**
Each student is assigned to his/her own instructor. Personalized questions are addressed via the student dashboard messaging system.

Online learning presents an opportunity for flexibility; however, a discipline to maintain connection to the course is required; therefore, communication is essential to successful learning. **Check your messages daily.** Instructors are checking messages daily Monday-Friday to be sure to answer any questions that may arise from you. It is important that you do the same so you do not miss any pertinent information from us.

**Holidays:**
During the following holidays, all administrative and instructional functions are suspended, including the grading of exams and issuance of transcripts.

- New Year's Day
- Easter
- Memorial Day
- Independence Day
- Labor Day
- Thanksgiving weekend
- Christmas Break

The schedule of holidays for the current calendar year may be found under the Student Services menu at www.portagelearning.com

**Code of Conduct:** Students are expected to conduct themselves in a way that supports learning and teaching and promotes an atmosphere of civility and respect in their interactions with others. Verbal and written aggression, abuse, or misconduct is prohibited and may be grounds for immediate dismissal from the program.

This is a classroom; therefore, instructors have the academic freedom to set forth policy for their respective class. Instructors send a welcome e-mail detailing the policy of their class, which students are required to read prior to beginning the course.

**Grievances:** If for any reason a student has a complaint about the course work or the instructor, the student is advised to first consult the instructor, who will be willing to listen and consider your concern. However, if you don't feel you have received a satisfactory reply, you are encouraged to contact the Academic Dean of Portage Learning for further consideration of your complaint. The formal grievances process must be initiated via
written communication. If desired, please file a written grievance to academics@portagelearning.com to initiate the process.

**Remediation:** At Portage Learning we allow a "one-time" only opportunity to re-take an alternate version of one module exam on which a student has earned a grade lower than 70%. This option must be exercised before the final exam is started. If an exam is retaken, the original exam grade will be erased and the new exam grade will become a permanent part of the course grade. However, before scheduling and attempting this retest, the student must resolve the questions they have regarding the material by reviewing both the old exam and the lesson module material. Once ready to attempt the retest of the exam they must contact their instructor to request that the exam be reset for the retest. Remember, any module retest must be requested and completed **before** the final exam is opened.

**Note:** Exams on which a student has been penalized for a violation of the academic integrity policy may not be re-taken.
